

**§ 1.464 Minor patients.**

(a) *Definition of minor.* As used in §§1.460 through 1.499 of this part the term “minor” means a person who has not attained the age of majority specified in the applicable State law, or if no age of majority is specified in the applicable State law, the age of eighteen years.

(b) *State law not requiring parental consent to treatment.* If a minor patient acting alone has the legal capacity under the applicable State law to apply for and obtain treatment for drug abuse, alcoholism or alcohol abuse, infection with the HIV, or sickle cell anemia, any written consent for disclosure authorized under §1.475 of this part may be given only by the minor patient. This restriction includes, but is not limited to, any disclosure of patient identifying information to the parent or guardian of a minor patient for the purpose of obtaining financial reimbursement. Sections 1.460 through 1.499 of this part do not prohibit a VA facility from refusing to provide non-emergent treatment to an otherwise ineligible minor patient until the minor patient consents to the disclosure necessary to obtain reimbursement for services from a third party payer.

(c) *State law requiring parental consent to treatment.* (1) Where State law requires consent of a parent, guardian, or other person for a minor to obtain treatment for drug abuse, alcoholism or alcohol abuse, infection with the HIV, or sickle cell anemia, any written consent for disclosure authorized under §1.475 of this part must be given by both the minor and his or her parent, guardian, or other person authorized under State law to act in the minor's behalf.

(2) Where State law requires parental consent to treatment, the fact of a minor's application for treatment may be communicated to the minor's parent, guardian, or other person authorized under State law to act in the minor's behalf only if:

(i) The minor has given written consent to the disclosure in accordance with §1.475 of this part; or

(ii) The minor lacks the capacity to make a rational choice regarding such consent as judged by the appropriate

VA facility director under paragraph (d) of this section.

(d) *Minor applicant for service lacks capacity for rational choice.* Facts relevant to reducing a threat to the life or physical well being of the applicant or any other individual may be disclosed to the parent, guardian, or other person authorized under State law to act in the minor's behalf if the appropriate VA facility director judges that:

(1) A minor applicant for services lacks capacity because of extreme youth or mental or physical condition to make a rational decision on whether to consent to a disclosure under §1.475 of this part to his or her parent, guardian, or other person authorized under State law to act in the minor's behalf, and

(2) The applicant's situation poses a substantial threat to the life or physical well-being of the applicant or any other individual which may be reduced by communicating relevant facts to the minor's parent, guardian, or other person authorized under State law to act in the minor's behalf.

(Authority: 38 U.S.C. 7334)

**§ 1.465 Incompetent and deceased patients.**

(a) *Incompetent patients other than minors.* In the case of a patient who has been adjudicated as lacking the capacity, for any reason other than insufficient age, to manage his or her own affairs, any consent which is required under §§1.460 through 1.499 of this part may be given by a court appointed legal guardian.

(b) *Deceased patients*—(1) *Vital statistics.* Sec. 1.460 through 1.499 of this part do not restrict the disclosure of patient identifying information relating to the cause of death of a patient under laws requiring the collection of death or other vital statistics or permitting inquiry into the cause of death.

(2) *Consent by personal representative.* Any other disclosure of information identifying a deceased patient as being treated for drug abuse, alcoholism or alcohol abuse, infection with the HIV, or sickle cell anemia is subject to §§1.460 through 1.499 of this part. If a written consent to the disclosure is required, the Under Secretary for Health

## § 1.466

or designee may, upon the prior written request of the next of kin, executor/executrix, administrator/administratrix, or other personal representative of such deceased patient, disclose the contents of such records, only if the Under Secretary for Health or designee determines such disclosure is necessary to obtain survivorship benefits for the deceased patient's survivor. This would include not only VA benefits, but also payments by the Social Security Administration, Worker's Compensation Boards or Commissions, or other Federal, State, or local government agencies, or nongovernment entities, such as life insurance companies.

(3) *Information related to sickle cell anemia.* Information related to sickle cell anemia may be released to a blood relative of a deceased veteran for medical follow-up or family planning purposes.

(Authority: 38 U.S.C. 7332(b)(3))

## § 1.466 Security for records.

(a) Written records which are subject to §§1.460 through 1.499 of this part must be maintained in a secure room, locked file cabinet, safe or other similar container when not in use. Access to information stored in computers will be limited to authorized VA employees who have a need for the information in performing their duties. These security precautions shall be consistent with the Privacy Act of 1974 (5 U.S.C. 552a).

(b) Each VA facility shall adopt in writing procedures related to the access to and use of records which are subject to §§1.460 through 1.499 of this part.

(Authority: 38 U.S.C. 7334)

## § 1.467 Restrictions on the use of identification cards and public signs.

(a) No facility may require any patient to carry on their person while away from the facility premises any card or other object which would identify the patient as a participant in any VA drug abuse, alcoholism or alcohol abuse, HIV infection, or sickle cell anemia treatment program. A facility may require patients to use or carry cards or other identification objects on the

## 38 CFR Ch. I (7-1-16 Edition)

premises of a facility. Patients may not be required to wear clothing or colored identification bracelets or display objects openly to all facility staff or others which would identify them as being treated for drug or alcohol abuse, HIV infection, or sickle cell anemia.

(b) Treatment locations should not be identified by signs that would identify individuals entering or exiting these locations as patients enrolled in a drug or alcohol abuse, HIV infection, or sickle cell anemia program or activity.

(Authority: 38 U.S.C. 7334)

## § 1.468 Relationship to Federal statutes protecting research subjects against compulsory disclosure of their identity.

(a) *Research privilege description.* There may be concurrent coverage of patient identifying information by the provisions of §§1.460 through 1.499 of this part and by administrative action taken under Sec. 303(a) of the Public Health Service Act (42 U.S.C. 241(d) and the implementing regulations at 42 CFR Part 2a); or Sec. 502(c) of the Controlled Substances Act (21 U.S.C. 872(c) and the implementing regulations at 21 CFR 1316.21). These "research privilege" statutes confer on the Secretary of Health and Human Services and on the Attorney General, respectively, the power to authorize researchers conducting certain types of research to withhold from all persons not connected with the research the names and other identifying information concerning individuals who are the subjects of the research.

(b) *Effect of concurrent coverage.* Sections 1.460 through 1.499 of this part restrict the disclosure and use of information about patients, while administrative action taken under the research privilege statutes and implementing regulations protects a person engaged in applicable research from being compelled to disclose any identifying characteristics of the individuals who are the subjects of that research. The issuance under §§1.490 through 1.499 of this part of a court order authorizing a disclosure of information about a patient does not affect an exercise of authority under these research privilege
